Mr. Noland,

I am attaching the pages of concern from my utility patent application as revised based upon your action summary dated August 12, 2004. Please review and advise if these will correct the issues you had with my original submittal. These changes were generated with the USPTO APX APXWriter software available online.

I can be reached at 708-204-0326 anytime.

Regards,

David Srebro
